Hi Ed,

I hope you and your family are well.

Thank you for your email and for your input on the leaf blower issue. The Village Board will certainly consider your thoughtful and well-reasoned comments as it deliberates on this issue tomorrow.

Wishing you a healthy and happy new year.

Best regards,

Marc

**CAUTION:** External sender.

In connection with the recent CAC report on gas blowers, which I understand will shortly be discussed by the Village Board, I attach a letter (the attachment with the "DT" number) for your consideration. I would appreciate its distribution to all Village Trustees and others interested in Village Hall.

The attachment to that letter was another letter, dated January 6, from a group of interested Scarsdale residents with whom I've worked in this subject matter. The second attachment to this message is what I have as the final version of the January 6 letter, the attachment to my letter. I say "what I have" because Darlene LeFrancois Haber was the lead signatory on the January 6 letter, and she advised that it was the final text. The circumstances, however, indicate that the signatory list in the second attachment here possibly may not be absolutely as sent to you previously, although the list should be close to final. Should clarifications be needed on that point, Darlene should be able to help.

Should there be any comments or questions, I would of course be pleased to discuss them at some mutually convenient time.

With thanks for your consideration, and best regards,

*Ed Morgan*
