Subject: Grass Clipping Pickups

I am writing in opposition to this new proposed 'regulation' on the Village no longer picking up grass clippings curbside. Why not try this on a 'voluntary' basis and see if it reduces the amount of pickups and waste? This will be a burden on homeowners who, for a variety of reasons, choose not to 'grass mulch.' Certainly, the elderly and infirm will have difficulty in taking these bags to the transfer station on their own. The alternative is to pay our gardeners to dispose of the clippings and they, in turn, need to pay for the privilege of dropping this 'waste' at the transfer station. With the continued increases in our taxes, why does the Village continue to try to reduce our services?

Those with allergies to grass may well be impacted negatively.

Thank-you.
