For me personally, I appreciate increasing recycling pick-up. Our recycling pick-up is larger than our garbage pick-up. I also compost, so that will be great to have curbside pick-up. I also don't want seniors/others for which bringing barrels to the curb is difficult to have an increased burden. Possible solutions:

Have an exemption for some from having to bring to curb?

Reduce garbage pick-up to once a week to offset recycling increase and still have same service as before (review amounts picked up and # of vehicles filled to see if makes sense)

Assume same service, but have additional recycling day coincide with compost day and that day we would need to bring to curb (not cost neutral but assume saves \$)

Thanks CB
