

I appreciate everyone's quick response and would like to add that sidewalks (or lack thereof) in Scarsdale, and especially on the SHS property from the Wayside entrance, are an abomination and while I am ignorant as to departmental responsibilities regarding our kid's safety, I'd like mention to everyone on this email chain the benefits of providing safe sidewalk for our kids:

1. More kids will walk to school benefitting from the accompanying health benefits of walking
2. Fewer kids will be driven to school, alleviating many of the traffic issues surrounding school drop-off/pick-up
3. **MOST IMPORTANTLY** - it will provide a safe environment for everyone that already is braving all the obstacles in place in our village against walking

Thanks for your consideration.
