Subject: Commingled Recyclables

Mr. Mayor and Members of the Board of Trustees I am another of Scarsdale's seniors who appreciates that my Recyclables get picked up at the bottom of my steep driveway, a service paid by taxes. I could not push or pull a heavy container up the hill, and would never be certain that it would remain there overnight. There is not much level land at that point. It is just about enough to take care of the stacks of bags of papers. Fortunately, these do not have wheels, so they seem to stay where they should. Attractive? No, but better than an ugly container which would be a disaster were it to land in the street or toppled down the driveway. I do think the food scrap pickup will be helpful. We have been a participating family, but we don't live close enough to the dump to make frequent trips, so we sometimes fudge, and put compostable matter into the garbage.

Dorothy Levin, 11 Overhill Rd.
