

To the village of Scarsdale Administration From Fox Meadow Road Neighborhood

Reference 138 fox meadow road

Cc/Mayor's Office & Building Manager

Dear sir /madam:

The construction at 138 fox meadow road has brought a living hell to the neighborhood WITH THE NOISE since the construction started. The contractor is building two house on a lot that housed one home before, who has given permission to build two homes on a one lot area. For the last three weeks it has been worse than living hell for the neighbors at 138 fox meadow road. He is using industrialize sized caterpillar tractor to break a rock for the last three weeks. When he realized that he could not break the rock, he continued to give super hell to the neighbors with the noise.

When the elderly is trying to sleep, they are unable to because of the noise. The students cannot do their homework because of the noise. When people return from work to rest, they cannot rest because of the noise. What has the village done to take care of the noise? How can the village not intervene? Now I am being told that he will use a machine to blast the rock. Would that not shake the next door neighbor house foundation? How come the village has allowed him to make all this noise? With what permission has he been able to do this? This has to be stopped immediately, by the mayor office. This man has intimidated the village, how come the village has not stopped the construction. Is the Mayor office aware of what is going on Fox meadow road? We would like answers from the Mayor's office. When will this noise stop, I would like to know an exact date. The contractor will get millions and millions dollar profit on this construction. What will the village get?
