Mr. Mayor,

The e-mail from Thomas Hagerman about not assessing school taxes was troublesome n many levels.

Firstly, it seems that getting an email from him, independent of the village seems odd. I would presume that you are working together in some capacity with the goal of saving the taxpayers money.

More importantly, just because you can't assess it, the village can still collect an estimation, just like my quarterly estimated income tax payments. It is up to the IRS to decide if it is wrong to deduct it in the year paid vs the year assessed.

Mr. Mayor,

Governor Cuomo recently signed an executive order suspending provisions in state law preventing prepayment of property taxes.

I saw the statement on the village website dated December 19th saying that collection was not feasible. Things have changed and prepayment needs to be looked into again. In fact, it would be a good idea to collect it now, and then sort out the details in January. There is a lot of money at stake here.

Lets find a way to get this done.
