Subject: Tree Law Hearing

Hi, Ingrid. I am the Chair of the BAR and also a concerned citizen/homeowner. I am also one of the unfortunates who have been without power since Friday evening as a result of the latest storm. I will attempt to be at this upcoming hearing, but would like to add to the current tree law proposal some prescriptive routine review of the trees surrounding power lines in Scarsdale. Whether it's done every year or two years, I'm not sure. I just think that the current law, as it is written and proposed, is not as fleshed through in the utility and right of way section as it should be, especially in light of current events. Please forward my recommendation to the appropriate parties. As I mentioned, I will try to be there to make the point, but I would like this recommendation to be entered into the record on my behalf.

Thanks!
