Subject: Great news!!!

We love the food program and are so glad we will soon have pick up from our homes! We only have one planet. I love this quote. When the last tree is cut down, the last fish eaten and the last stream poisoned- only then will people realize you can't eat money!

Thanks you for making this happen. It also makes our town more appealing to new home buyers. Millennials are very interested in being green.
This program is a win - win!

Thank you again!
