**Subject:** Pool Non-Residents

CAUTION: External sender.

Hello,

I wanted to contact you to please ask you to reconsider the decision to offer pool memberships to non-residents. COVID is still a threat, and I absolutely do not think it is right to make the pool more crowded. Not even all adults will be vaccinated by then.

Furthermore, the price point, \$1200 (plus the option for guests), is another issue, as it's even lower than Lake Isle. Rather than offer 100 memberships to non-residents, with no community ties, a survey should have been sent (as it is for every other pool, camp, or rec issue) asking people's opinions on raising prices versus offering non-residents (without having to be sponsored or show some- even remote- connection to the community) a membership option. I believe the village is set to receive other financial assistance as well.

Similarly, I was surprised that we receive numerous emails on jewelry making, every sport offered, etc., but there was never an email about this. I happened to know of it because one friend saw it on the website, forwarded it to another, who forwarded it to me. When I spoke to 6 other people this morning, no one knew about this. I know I am not alone in expressing my views, as I know others have emailed as well.

Lastly, one of the things that drew us, and others to Scarsdale was that there is/was a pool, devoted to just residents. It's a valuable asset for THIS community and I was shocked that non-residents did not even have to show some connection to the community.

A year where COVID is still present and only a small population is vaccinated is not the year to experiment with this non-resident option.

Thank you,  
Kymberly Kaufman
