Subject: Proposal to change sanitation

Dear Mayor Hochvert,

I am writing in enthusiastic support of the recommendation to the Scarsdale Board to add weekly curbside pick up of food scraps and to increase commingled recycling pickup. However, to prevent an impact on the budget, it has also been proposed that residents would need to put recyclables and food scraps at the curb rather than at the back of their driveways. I fear that making recycling less convenient will have the opposite of its intended effect: Scarsdale residents, who are used to convenience and privilege, might just throw away their food scraps and stop recycling rather than doing the extra work of dragging their containers to the curb. To promote ecologically sound practices, I ask you to find a different way to budget for food scrap pickup and increased recycling, but allow residents to put them at the bottom of the driveway.

Thank you,

Lauren Porosoff
22 Olmsted Road
