Subject: Re: From Susan Levine....about the Idling Signs at Greenacres School

CAUTION: External sender.

Hi Susan. Happy New Year! Thank you for continually striving to improve the Scarsdale experience. I am copying our Village Manager and the BOE President and Superintendent of Schools. I want to keep everyone in the loop with respect to mutually beneficial initiatives. I will leave it to the administrators to propose next steps. Thanks, Jane

Hello Mayor...and Trustees...

I just learned that the No Idling Signs that appear on Poles on the Blocks at the Greenacres School area were the work of Michelle Sterling.. our very own Village environmentalist...who had them Posted in 2011 to prevent the Pollution from idling care engines at Greenacres...and save our children's lungs.. The Signs were just being Reinstalled after the Greenacres School renovation...which is when I spotted them..

I will be suggesting that the other Schools follow Greenacres example and Post similar No Idling signs...Michelle has the artwork that is needed and the PTAs would fund the signs... A small step in the right direction..for our children...and the planet...

The Police would then have to Enforce the Idling Ban..which is a Westchester County Law..

****No Idling a Vehicle for more than 3 Minutes When Sitting or Parked.. when the Temperature is above 35 degrees****

Michelle called me to tell me that it was she who had the signs installed 10 years ago. She now works for Amy Paulin to whom I had sent an email about the matter...Michelle is an amazing public servant...someone who really gets things done.

Wishing you all a healthy 2022...

Susan Levine
