**Subject:** 23 Innes Road

Dear Mayor and the Village Board,

I finally had the chance to drive to 23 Innes yesterday afternoon.

This is a house that should not be demolished. It has a slate roof, stone facade and even a false pigeoniere.

Look at the house right next it. This street, nor Scarsdale does not need another insult.

What the developer is proposing in its stead will be one more eyesore that does not belong there. He is proposing synthetic slate instead and not even considering recycling or reusing the stone or slates... AS you know I attended both the CHP and the BAR meetings on this.

For the developer with a long history of abuse and cheap materials and poor workmanship, the cheaper, the quicker the better. He cannot even bother to use what is there... This kind of ideology and "workmanship" is not Scarsdale.

We have one there already: 21 Innes. A perfect example of our failing land use laws...

Please see me my latest entry on my website on this house and this morning before the bulldozer starts, **Stop this. By executive order.**

This house is the perfect example of what we should preserve. We have to preserve this now, this morning, Before that bulldozer starts. It was luck that stopped it yesterday. The weather.

**Now, you stop it !**

I hope you can do this much for your Village.

Lika
