CAUTION: External sender.

Dear Mayor and other Village Decision-makers:

As one who has lived with a flooded basement and periodic lake-front property for the last 32 years, I plead with you to consider and enact the following:

- Stricter codes governing stormwater management are needed, especially in Sensitive Drainage Areas. Tapered slopes and Buffer Areas are not enough.
- Unrestrained development is altering drainage patterns all over the Village and causing flooding. The preponderance of variance grants that circumvent the codes must end.
- Multi-acre clear-cutting and terrain raising must be banned.
- Encroachment on wetlands must stop.
- Independent verification of soil testing and the measuring of historical groundwater tables must be required. Collection of faulty data gives faulty results.

THE BURDEN SHOULD NOT BE ON NEIGHBORS TO PAY FOR INDEPENDENT VERIFICATION!

Thank you.
Lisa Rodman
