Subject: Potential Change to Recycling Pick-Up

Dear Mayor Hochvert,

I write with regard to the Conservation Advisory Counsel proposals. First, I want to thank the Board for working to improve the already great sanitation services in the Village as well as trying to help residents increase the amount that they currently recycle and food-scrap. I believe that a key element of ensuring people continue the important work of recycling is making it as easy as possible, which means adding curbside collection for food-scrapping. It also, though, includes continuing to allow residents to keep their recycling containers anywhere on their property rather than requiring that they bring the materials to the curb, which would create a new obstacle to participating in the important and successful recycling program that we have in the Village. To that end, I request that no change be made to the location of the pick-up of commingled recyclables.

Thank you for your consideration.
