> Subject: Curbside food scrap pick up

>

> Just wanted to let you know that curbside foodscrape pick up would be great. I have been participating in the compost program since September and it is great to make it possible to deal with our trash in a more environmentally friendly way. I have so much less trash now than I did before. So many more people in the community would participate if they didn't have to run their trash over to the dump themselves.
