Subject: CARTON RECYCLING HAS COME TO WESTCHESTER COUNTY!

SNAP Board Members -- The County has just announced that carton recycling has come to Westchester County. This is for paper containers that have a waxy lining. Attached are both the County announcement letter and a picture of a few of the items that can now be put in with other recyclable items.

Since recyclable material collected by the Village is eventually taken to the County recycling facility, what this means is that residents should now put all cartons (such as milk and juice cartons), and juice, soup and milk boxes in their recycling bins along with their plastics, glass and cans.

The Village is in the process of getting the news of this development out to residents. Your assistance in helping the Village with that effort will be appreciated. Forwarding this email and the attachments to your neighborhood associations would help.

Thanks in advance for your assistance in this matter.

Very truly yours, Jon Mark
