Thanks Merrill. As I said at the Municipal Services Committee meeting on Tuesday, it is a lovely idea. The sticking point is that there is no economic meaningful upside/savings for the Village. Implementing the program is simply an expense -- as the proponents of the program candidly admit.

That said, the Board will mull it over as part of the budget process along with all other matters clamoring for budget allocations.

Best regards, Jon Mark

Subject: food scrap recycling

Good to find a way to fit a separate recycling case (food scraps) into Village procedures as a pilot, similar to what Michelle has offered as a start. Whether 2% homes (or less or more) is debatable, though the parts of a potential rollout should be present in a variety of homes and locations. As I mentioned to Michelle, the recommendation needs a success metric as well as a future rollout estimate.

I'd be interested in how sanitation/recycling could fit it in. School experience is encouraging but kind of irrelevant to Village pickup. Pilot home selection is tricky but not impossible...
