Subject: Re: Drivers speeding

Hi Nevel,

Thank you for your email.

The Village has been seeking NYS approval to reduce our area speed limit from 30 MPH to 25 MPH. We have the support of our State representatives but the pandemic cut short the State Assembly session in 2020.

I spoke with Assemblywoman Paulin early this week about the status of Village's requested speed limit legislation. We remain hopeful that the Assembly will enact legislation in 2021 that permits Scarsdale to reduce its area speed limit to 25 MPH.

Be well.

Marc

Good Morning Mayor Samwick,

As a Scarsdale resident on Woodland Place, I am noticing many cars speeding through Woodland as well as neighboring streets where the village speed limit is 30 miles per hour. Many drivers are going much higher than this speed limit. My suggestion would be to lower the speed limit on side streets near the train station and Christie Place to 25 miles per hour or keep police patrol on these streets at all times to enforce the speed limit. There are multiple people walking or exercising on these streets and I myself have young children that I walk through the village streets.

As a long time resident, I want to ensure the streets of Scarsdale are safe for pedestrians.

Please take a look into this. I'd be happy to meet with you to address any questions you may have regarding this.

Best Regards,
Neville Kapoor
