Subject: Opposed To The Elimination of House Pickup of Recycle Bins

To : Scarsdale Mayor and Board of Trustees and Village Manager and Staff,

Here are some further reasons to oppose the elimination of house pickup of recycle bins . Many Scarsdale homes have driveways that slope down to the street or slope up to the street curb . This fact adds to the negative impact on the health of Scarsdale residents that have to lug and drag their recycle bins to the curb and later return their bins to the house particularly during the winter months. How many heart attacks would the Village of Scarsdale like to cause !!!

In certain sections of Scarsdale including Murray Hill Middle Heathcote and the Grange area and other homes that have long driveways to their homes the Village would be causing a very negative health impact and new stress on these homeowners to lug their recycle bins back and forth to the curb. These home owners pay substantial property taxes and should not have their sanitation services of house pickup of recycle bins eliminated .

We again urge the Village Board NOT to eliminate house pickup of recycle bins that would be a major negative for most Scarsdale homeowners and create a hardship for them .
