Dear Mayor Veron,

It's stunning to me that decades of independent peer-reviewed science are being completely disregarded in favor of service benefits.

The goal here must be a win-win. If you go ahead with Verizon's plan, to erect a 44-antenna cell tower, Verizon wins and residents lose. There are better, smarter, safer ways to achieve improved service and they must be investigated before you put Scarsdale homeowners and their families at risk. This is just common sense.

Thank you for taking a re-look at Verizon's proposal and voting to put it on hold until a safer solution is found.

Yours truly,  
Ruth F. Moss
