Subject: Food scraps recycling programs

Dear Mayor and Trustees,

For a long time I thought about food scrap recycling ( I felt guilty over every corn cob and eggshell I threw in the trash) but it wasn't until I met Ron at the local farmer's market that I committed to participating. My reluctance was twofold; I didn't have a secure garage to prevent animals and odor from the green bin and a trip to Secor Road once a week seemed burdensome. Ron suggested a metal trash can to be kept outside (which I purchased) and I decided saving the planet was worth a weekly (actually slightly less often) trip to Secor Road.

I was as excited as a child with a new toy and couldn't wait to begin. Well, I now get great satisfaction every time I throw an eggshell or other food scrap into my counter top recycling container which (as Ron assured me) is convenient, easy to clean and odor free. I know I am doing my small part to save the planet for future generations. From the start I thought that the only improvement to the program would be curbside pickup (I know they do it in the city of San Francisco); three uniform size color coded bins (very neat). If they can do it in a large city, I can't imagine why we can't do it here. After all, "This is Scarsdale!" I think this would encourage many more to participate, and what bragging rights it would bring in addition to its wonderful merits.

Yours truly in saving the planet, Sandy P. Klein
