Dear Mayor Samwick and Clerk Conkling,

I would like to express concern over the installation of cellular antennas and towers that increase the spread of 5G in our village. The FCC has never studied the health impact of any of the wireless radiation we are exposed to, yet the telecom companies are expanding their deployment of wireless infrastructure despite many peer-reviewed studies showing adverse effects of electromagnetic radiation on people, animals, and our planet. Immune dysfunction, ADHD and altered brain development, headaches, cancer and tumors, sleep and memory disturbances, sperm and reproductive dysfunction are just some of the biological effects of wireless radiation on people. There are also studies showing wireless radiation contributing to colony collapse disorder, or the massive decrease in our bee population which is essential to many ecosystems for their pollination. For more information about 5G and wireless radiation, [childrenshelathdefense.org](http://childrenshelathdefense.org) is a great resource.

I would like to voice support to stop the installation of 5G antennas and towers in our village in order to help protect the health of the people and our planet from the adverse effect of wireless radiation.

Thank you for your service to our village.

Sincerely,  
Kelly Sperling  
63 Tunstall Road  
Scarsdale, NY
