Subject: Library project

Please, stop this madness of spending public money massively and continuously, year after year or I should say stop spending money that you don't even have. Stop the Greenacres project, stop the library project and any other gigantic projects you may have in your files. To be honest, such an accumulation of senseless and grandiose architectural projects is so absurd that one may wonder what can be the actual motivation of their promoters.

STOP now municipal SOCIALISM, stop now these burlesque plans of uncontrolled distribution of taxpayers money. Instead, you should start working hard on how to reduce local taxes...

Thanks for your attention

Anthony Lacoudre (who comes from a European country dying of socialism)
