Subject: From Susan Levine....The.Gas Powered Leaf Blower Ban...Starts May 1

CAUTION: External sender.

To the Mayor and the Trustees..

Just my continual concern that the Leaf Blower Ban has largely been Ignored since it was first enacted in 1994..
and unless the majority of the population of Scarsdale knows about it...and Requires their Landscapers to Comply..
starting on May 1...nothing will change.

Having Enforcement of the Law will be a major positive action....when it occurs...
and if it is vigorous...and ongoing...
Summonses...not Warnings..should be part of the enforcement.

I also think Increasing the Fine for any offense is a good idea.
\$75 has always been a joke to the gardeners (they tell me)..and has never encouraged compliance. \$250 might.

Hoping for the best..but expecting no change and
lots of noise and pollution this Spring and Summer from the gas blowers
until many more Village residents know about the Ban...and take action
to require their gardeners to follow the law....

Thanks for listening..

Susan Levine
